

Biometric CUSS Solution

Airports and airlines continuously strive for improving the experience of travel. There is rising demand for implementing faster check-in processes, reducing time in queues, enabling cost-sharing among operators and optimizing real estate.

As worldwide travel regains momentum, Vision-Box's brand new biometric common-use self-service solution is a new offering for enrolment and verification that adapts to today's requirements from passengers and operators alike.

The product is part of a fully integrated, multi-context identity management solution, and is designed to enroll biographic and biometric data as well as authenticate and accept +10K types of travel documents. Its launch application is based on CUSS 2.0, and it is also compatible with legacy CUSS versions.

The biometric CUSS kiosk is designed for inclusivity and accessibility facilitating usage by users with reduced mobility as well as families.

Airline certification

- Smooth certification process and no changes required on existing CUSS applications.
- Airlines can re-engineer the apps with a smooth transition period from CUSS 1.X to CUSS 2.0 standards
- Cost and dependency reduction from legacy CUSS providers

Seamless Experience

- Active biometric services integrated with seamless flow experience enables traveller enrolment during check-in
- Liveness check offers a secure self-service experience
- Travellers are able to use their faces as their boarding pass throughout the journey
- Integration with airline applications
- Leveraging Orchestra's Digital Identity Management Platform, which is privacy-by-design certified

Flexible device

- Biometric and non-biometric configurations
- Optional contactless and mobile pre-enrolment applications
- Liveness detection to prevent spoofing
- Ability to customize branding and color
- Adaptive lightning
- Boarding pass and Bag tag printing
- ADA and CSA compliant
- Native support for CUSS 2.0 and 1.5.2 standards
